STOP SIGN NOTIFICATION

Installation of new STOP signs for both east and west bound traffic on Stetson Ave at the Stetson Bridge is scheduled for Tuesday July 31st, 2018. This section of roadway is located on W. Stetson Ave. between Cawston Ave. and Warren Rd. Installation will include stop signs, advance stop warnings and flashing beacons.

Current plans are underway to replace the outdated bridge, but until that time stop signs are being installed to reduce the speed of vehicles as they drive over the bridge structure. All current weight load restrictions remain in effect for the bridge.

Thank you.
